CERTIFICATE

This is to certify that the micro - project entitled “CAR RENTAL WEBSITE” submitted by **SHAH VANSH ALPESHKUMAR (226240307060)** , **PATEL JIYAL ANKURBHAI (226240307042)** , **VAIDHYA SAI NARENDRABHAI (226240307074)** and **JOSHI RUDRANT ASHISHBHAI(226240307025)** towards the partial fulfillment of the requirement for Continuous Assessment (CA) to facilitate integration of Course Outcomes (COs) in Responsive Web Page Design (4330705) is a record of the work carried out by him/her under my guidance and supervision. The work submitted, in my opinion, has to a level required for being accepted for the examination.

Guided By:

Ms. A. R. Shah

Government Polytechnic,
Himatnagar – 380001

Head of the Department:

Mrs. M. P. Mehta

Government Polytechnic,

1.0 Brief Description

The micro-project for Responsive Webpage Design (RWD) was like crafting a cool website using Bootstrap, HTML, and JavaScript. It's all about making a website look good on phones and computers. My site is all about renting fancy sports and luxury cars and looks great on any device, thanks to Bootstrap. I learned to use GitHub to share my work with others and put my site on the internet for the first time. It was a bit tricky, like learning a new dance, but I got the hang of it. The project taught me how to make sure the website looks good on small and big screens.

2.0 Aim of Micro Project

The aim of my micro-project in Responsive Webpage Design is to make a website that looks good on phones and computers. I want to use what I learned about HTML, Bootstrap, and JavaScript to create a site where people can easily rent cool sports and luxury cars. I also want to show that I can make the website work on different devices, especially on mobile phones. By using GitHub, I'll learn how to share my work with others and put my site on the internet. The goal is to make a website that's easy for people to use.

3.0 Course Outcomes Integrated

CO1) prepare environment for bootstrap framework for first time use

CO2) build different web page layout adhering to all platform and size

CO3) apply reusable bootstrap components to design effective user friendly web page

CO4) develop interactive features rich web pages using bootstrap jquery plug-ins

4.0 Actual Procedure Followed.

3	https://chat.openai.com/	Good

7.0 Skill Developed/ learning out of this Micro-Project

1. **HTML Proficiency Enhancement:**
 - Develop a strong command of HTML, the foundational language for constructing the structure of web pages.
 - Gain expertise in organizing content and establishing a logical hierarchy within the website.
2. **Utilization of Bootstrap for Responsive Design:**
 - Incorporate Bootstrap, a widely-used front-end framework, to achieve proficiency in responsive web design.
 - Ensure a seamless and visually appealing user experience across various devices and screen sizes through Bootstrap's pre-built components and responsive grid system.
3. **Simplified Interface Development:**
 - Utilize Bootstrap's features to create a user-friendly interface without delving extensively into intricate CSS styling.
 - Leverage the pre-built components and grid system to streamline the interface development process.
4. **Emphasis on Clean HTML Markup:**
 - Understand the importance of clean and semantic HTML markup for effective web development.
 - Recognize the significance of external libraries like Bootstrap in optimizing the development workflow.
5. **Application of Design Principles:**
 - Implement key design elements such as navigation menus, car listings, and reservation forms to enhance skills in structuring and styling web content effectively.
6. **Handling Dynamic Elements:**
 - Navigate the inclusion of dynamic elements, particularly forms for user input.
 - Potentially integrate JavaScript to add layers of interactivity, broadening the understanding of collaborative technologies in functional user experience.
7. **Comprehensive Learning Opportunity:**
 - Engage in a holistic learning experience covering web design principles, responsive development, and the practical application of front-end frameworks.
 - Build a car rental website as a real-world project, applying theoretical knowledge to create a functional and aesthetically pleasing online platform.
